Buy/Sell spread	+/- 0.20%

² Inclusive of the net impact of GST

Cash weighting of Fund

■ Cash ■ Volatility

Risk weighting of Fund

■ Cash ■ Volatility

The two pie charts above illustrate that although the majority of the Fund is invested in cash, it is not a traditional 'cash fund'. The majority of the Fund's risk exposure is derived from the volatility component of the investment strategy. More information can be found in 'Investment Strategy and how the Fund is managed' in Section 3 of the Fund's Product Disclosure Statement dated 22 February 2017 available at www.gsfm.com.au

Fund changes

There have been no material changes to the following since the last monthly update:

- Funds risk profile
- Funds investment strategy
- Key investment professionals for the Fund; and
- Key service providers.

Fund objective

The Fund aims to generate long-term absolute returns that are negatively correlated to Standard & Poor's 500® (also known as the S&P 500 Index®¹) (SPX), with an emphasis on positive returns when the SPX experiences falling (or 'bear') markets.

It is expected that the investment strategy will perform best in periods where the SPX is falling and volatility is high. In periods where the SPX remains stable or increases only steadily, the investment strategy is expected to generate cash-like returns.

The Fund aims to achieve its investment objective by investing a portion of the Fund in CBOE Volatility Index (VIX)² options (and other volatility related options being SPX options and VXX options) to gain exposure to volatility on the SPX (the volatility component).

The majority of the Fund is invested in cash and cash-like instruments, which include derivatives such as OTC interest rate investment contracts (for example Total Return Swaps) and bank bill futures traded on the Australian Securities Exchange (ASX) (Cash), and is expected to generate cash-like returns in periods where the SPX remains stable or increases only steadily and volatility is low (the cash component).

Fund review

The Volatility Advantage Fund returned -0.21% for December 2018, while the S&P 500 index had another tough month returning -9.18% in US dollar terms.

Despite supportive corporate fundamentals, a plethora of concerns weighed in on stocks in December. These include the trade war, slowing growth in China, Brexit negotiations and the US government shutdown. The S&P 500 declined with increased volatility throughout the month until Christmas, after which the market recovered some of the losses in a thinly traded relief rally.

The VIX complex had a subdued reaction to the market selloff relative to historical norms. The VIX index spiked from below 20 to over 35, before rapidly snapping back into the mid 20s, while VIX futures never traded higher than the mid 20s. The Fund's options portfolio was modestly long the VIX for the December expiration and made a decent positive return. This was offset by losses in the tail hedge which went in the red as the rise in the VIX was insufficient to put the position into positive territory.

Key investment professionals

Simon Ho, Chief Investment Officer

Simon founded Triple Three Partners Pty Ltd (Triple3) in 2009. He has over 20 years' industry experience, having held senior options trading and risk management roles at firms including Goldman Sachs London, Merrill Lynch New York, and JP Morgan Singapore. He is involved in various initiatives within the options industry to develop volatility-based products and is a regular options expert contributor to various TV and print media outlets. Simon completed a Bachelor of Social Science (Economics) at the University of New South Wales in 1992.

As the CIO, Simon spends a substantial amount of his time overseeing the management of the Volatility Advantage investment strategy.

John Zhu, Portfolio Manager

John has over 9 years' experience in financial markets, in both quantitative research and trading. His previous roles include quantitative trading at ABN Amro and Royal Bank of Scotland and options market-making at Optiver. John completed his BSc Honours (First Class) in Applied Mathematics specialising in quantitative finance at Sydney University in 2006, where he won the prestigious University Medal.

John is responsible for implementation of the strategy of the Fund on a day to day basis. John primarily spends his time on investment activities applicable to the Volatility Advantage investment strategy.
