MONTHLY SUMMARY

The Munro Concentrated Global Growth Fund returned -0.2% over the month of March (-0.8% from equities and 0.6% from currency), while the MSCI World (Ex-Aus) returned 5.1% (4.3% from equities and 0.8% from currency). Global equity markets had another positive month in March. However, the strong market performance masked significant volatility under the surface as leadership rotated aggressively towards more cyclical stocks that would benefit from the "re-opening" of businesses and economies, generally at the expense of longer duration assets like bonds, gold and growth equities. Key contributors included Climate beneficiaries Vestas and Enel, and High Performance winner, ASML. The main detractors for the Fund were smaller market cap technology holdings. On equities markets more broadly, we remain positive. COVID ending is good for growth and good for corporate earnings.
