The fund payment amount calculated under section 12A-110 of the Act can be more or less than the cash distribution paid. For example, it requires any discount capital gains that form part of a distribution to be grossed up (doubled), and that capital losses from non-taxable Australian property that have been applied against capital gains from taxable Australian property are added back when determining the fund payment amount.

The amounts applicable to you can be calculated by multiplying the cents per unit by the number of units you held as at distribution entitlement date.

Australian resident unitholders should not rely on this information for the purposes of completing their income tax return. Details of the full year tax components of distributions (including any AMIT net cost base adjustment) will be provided in the 2026 Attribution MIT Member Annual Statement (AMMA) to be issued at a later date.
